

# Solar Clutch

## Solar Cooking in the Afar region Ethiopia

The nomadic Afar people are beginning to settle into town and villages as their world interacts with modernization.

The sun is intensely hot in the Afar region of Ethiopia and it offers some of the best climate for solar cooking on the African continent.

Using discarded wheel chair boxes for our cookers proved a real blessing. We used the plastic "Polyfurnace" as the template for the "cookits" we made.

Wheelchairs help restore honor and dignity to the Afar men and women who are handicapped. They now can move from place to place without being carried. We made double use out of the boxes by recycling them as "cookits" for the women to prepare food.

*A Little Bit of Sunshine in Every Bite !!*
