

Solar Cooking Awassa-Ethiopia

Ebenezer Grace Orphanage

Solar cooking at an orphanage in Ethiopia gave us the joy of helping the abandoned children of the streets. These children were loving and caring toward us as well as each other. Many thanks and a special blessing to the founders Argaw and Rachel who have given their lives to invest in the lives of others.

One electric stove cooked for 13 children each day and if there was no electricity then it was back to charcoal or a stick fire.

We trained the adults in solar cooking and left enough cookers to cook for all the children. We have since heard that they cook every day with the solar cookers and have found them to be their main oven when the sun is shining.

Our hope is that not only will this orphanage be blessed by harnessing the power of the sun but the whole community surrounding it will also adopt this simple technology.

We anticipate that these young Ethiopians will grow up learning to utilize the natural resources at their disposal in a responsible and renewable manner.

We will continue to partner with this community for the advancement solar cookers and trust this is the beginning of a great future for Awassa region.

For more information of how to partner with us in helping this community in solar cooking:
