

Community Involvement Community Involvement

Even though we now have a more mechanized method of manufacturing the “poly-furnace” we still need volunteer help. This is especially true when we sort and inspect our cookers. We also want to put a personal touch on them so we have students write words of encouragement to the women of Darfur.

Thank you to all the local schools and businesses in Fort Wayne for your help in this community effort. Thank you Sipe Engineering for making the special cutting die and to Kelly Box for giving us the use of their press. Thank you to Love Church Community Center for a place to work. And a big thanks all the volunteers and students who helped make, fold, pack and sign these cookers. These cookers are truly a *Labor of Love* from all of us in Fort Wayne Indiana to the people of Darfur.

You Are Not Forgotten!!!!
